

Safeguard Your Business From Common Scams

Internet crime complaints soared in 2020 – up nearly 70 percent from 2019 and it continues to grow with more organizations doing business online.

Stay safe by remembering these tips:

1

Scams are Everywhere

Scams come through social media, emails, phone calls, text messages, mail and even in person. Protect yourself and remember scammers are everywhere.

2

Emails are Not Secure Unless Encrypted

Never send any personally identifiable information (PII), passwords or medical information over unencrypted email. Sending an unencrypted email is like mailing a letter in a clear envelope.

3

Do Not Fall for Email Spoofing

Email spoofing is a form of cyberattack that looks like it is from a trusted source. Before clicking, changing or sending anything, verify the email is from your trusted source.

4

Do Not Click on Hyperlinks in Emails

Scammers want you to click on hyperlinks to trick you into sharing information or to run malicious code. Don't click! Open a browser and go directly to the website instead.

5

Confirm Wire Transfer or Direct Deposit Changes Via Another Method

Emails requesting wire transfers or direct deposit changes should always be confirmed with the other party through a phone call or in-person conversation.

6

Protect Your Business with Cybersecurity Awareness Training
